

Summer Series 2016 Recommended Course Combinations

This summer, we have created several 2-day workshops designed either to stand alone or to conveniently piggyback (either before or after) a relevant 3- or 5-day course. Discounts are applied to workshop registrations when a 3- or 5-day course is also selected (see Course/Workshop descriptions on our website for information).

Following are our suggestions for course/workshop combinations you may wish to consider:
